Marine Invertebrates

Marine Vertebrates

Human Impact

Grading-

20% Daily

40% Quizzes and Labs

40% Tests

Dissections-

Bony fish

Starfish

Squid

Crayfish

This is a fun class mainly for 11th and 12th graders. Most of the work is done in class and there is no specific “homework”. The first semester is spent talking about Texas fresh water. The second semester we will be learning about many of the animals in the ocean and their habitats and interactions.
